MULTI-PLEX EP 2

High quality special lithium complex greases suitable for high temperature operations and heavy load requirements. Operating Temperature: -30 ° C to +150 ° C.

Anwendungen

This greases are suitable for a wide range of general purpose applications demanding EP and high temperature properties. They can be used in heavy duty wheel bearings axles, ball joints, chains, cables etc.

- Resistance to water washout.
- Excellent adhesion to metal surfaces.
- Maximum equipment protection.
- Wide temperature range of efficient operation.
- High resistance to extreme operating conditions.
